

WE WON'T BE SILENCED

The Postmaster General and Postal Board of Governors are gagging the American public from speaking out about the poor postal services in our communities. PMG Louis DeJoy, in addition to dismantling delivery service standards, is also dismantling long established opportunities to address the ruling Board of Governors who are responsible for the postal services provided to all Americans.

STIFFLING PUBLIC COMMENT IS UNAMERICAN

WHAT DO THEY HAVE TO HIDE? Why silence the voice of Americans who care about the quality of mail service, long lines, increased postage, misdelivered mail and delayed mail?

As it is, only 45 minutes “was” allotted for citizens to address the Postal Governors and voice their community’s concerns.

The PMG’s misnomer *Delivering For America plan* has been decried for the delayed mail service, nonsensical relocation of postal operations to far away distant cities. The Post Office lines are getting longer, staffing is inadequate, postage is increasing and our community postal facilities are losing postal workers. Americans have a right to have their voice heard!
